

HTML: Chapter 1 Questions

Please note that Figure 1-4 on page 10 is incorrect. It is missing the <head> tag. It should read as follows:

```
<html>
<head>
<title></title>
</head>
<body>
<center></center>
<p></p>
<p></p>
<p></p>
<p></p>
<p></p>
</body>
</html>
```

Please get in the habit of using lower case when you write your tags. Example: use <head> instead of <HEAD>.

This is the table that is found in your book on page 8. Please fill it in with seven tags that you keep seeing in the source of the pages you have been viewing.

NUMBER	TAG	EFFECT IT CAUSES ON THE WEB
<i>Sample</i>	<i><center></center></i>	<i>Centers text on a Web page.</i>
1		
2		
3		
4		
5		
6		
7		

TRUE/FALSE (2 points each)

Circle T if the statement is true or F if the statement is false.

- T F** 1. The tag defines a list item.
- T F** 2. The tag creates a bulleted list.
- T F** 3. The <center> tag formats text so that it is centered on the page.
- T F** 4. The tag creates a bulleted list.

FILL IN THE BLANK (3 points each)

Complete the following sentences by writing the correct word or words in the blanks provided.

1. An unordered or _____ list shows items that don't need to be listed in order.
2. An ordered or _____ list shows items in a numerical order.
3. File _____ are three-letter (or more) suffixes that tell what type of file a file is.
4. HTML is made up of _____, which are commands enclosed in angle brackets (<>).

WRITTEN QUESTIONS (5 points each)

Write a short answer to each of the following questions:

1. Explain how you would view the HTML source code for an HTML Web page.
2. Explain how you must save HTML text pages.
3. What are filename extensions? Give examples.

CRITICAL THINKING (15 points)

1. There is an error in the following set of tags. Please find it and fix it.

```
<ol>
<li>Item A</li>
<ul>
<li>Item A1</li>
<li>Item A2</li>
</ul>
<li>Item B</li>
<ul>
<li>Item B1</li>
<li>Item B2</li>
</ul>
</ul>
```

What will the current tags do to your page? What does it look like after you make the correction?

SUMMARY PROJECT (50 points)

All good authors know that before starting a big writing project it is often a good idea to create an outline of the information they wish to present. Outlines can be very effective in helping writers organize their thoughts, and to make sure their writing follows a logical flow of ideas. Use the HTML skills you have learned in this lesson to create an outline for a book which is composed of units, chapters, and sections. Figure 1-21 in your book (on page 31) will give you an idea of how your completed outline should look.

Requirements:

- ✓ Your page must have a title that shows in the title bar of the browser.
- ✓ Your outline must have a title that is centered at the top of the page.
- ✓ Your outline must contain at least two units in an ordered list.
- ✓ Your outline must contain at least three chapters per unit, also ordered.
- ✓ Your outline must contain at least three sections per chapter – not ordered.

First zip up your HTML file, name the ZIP file something with your name in it, and upload it to the J: drive in the handin location. Then print out your source code, and staple it to this packet before handing it in.
